Stand Alone Options

- **Metallic paint** 475
- **Electric Silver paint** 675
- **17-inch "Sargas" alloy wheels**
- **Dual outboard two-stage child booster seats with adaptive seatbelts and power child rear door locks**
- **Volvo Navigation System with DVD map data and remote control** 2120
The Volvo Navigation System guides you on your way with an easy-to-read 6.5" color screen which retracts into the dash when not in use. The screen displays your location on the map by utilizing a global positioning satellite system. New DVD technology gives you access to all of the U.S. and Canada. Pricing may vary due to standard or optional equipment within vehicle.
- **Dual screen rear seat entertainment system** 1800
With Volvo RSE dual screen, the rear seat passengers can watch a DVD film or play a game-together or separately. Two 7-inch wide-screen displays are integrated in the front seat head restraints and provide excellent image quality. Wireless headphones keep things calm in the cabin and you can listen to the music or program of your choice. The RSE system is an integrated part of the car and matches the interior perfectly.
- **Adaptive cruise control with collision warning and brake support** 1,495
ACC is designed for smooth traffic flow. You just select the desired speed and the minimum time gap to the vehicle in front of you. When the radar sensor detects a slower vehicle in front of you, the speed automatically adapts to that vehicle.
- **Blind Spot Information System (BLIS)** 695
The Blind Spot Information System (BLIS) is particularly reassuring in congested and fast-moving traffic situations. Using rear-facing digital cameras installed in the door mirrors, it monitors the traffic on either side of the car. As a vehicle enters your blind spot, the system helps alert you with a discreet lamp built in to the front door post on the approaching side of the car. Together with the door mirrors, this helps enable you to quickly assess the feasibility of a lane change. The system is activated once the car exceeds 6 mph, and reacts to almost any type of motor vehicle. It works equally well, day or night. Always check your mirrors. Be aware of the traffic around you.
- **Personal Car Communicator (PCC) includes Keyless Drive, two-way car communication and heartbeat sensor** 495
The PCC is an advanced remote control that combines keyless drive with two-way communication with your Volvo. Keep the PCC with you and the car unlocks automatically on your arrival. Start the engine with a press of a button, lock the car by

pressing a button in the door handle. Later in the day, if you're wondering whether you've locked the car, your PCC can remind you; no matter where you are. And when you return to your Volvo - within a radius of 65 to 109 yards - pressing the PCC information button will give you a current report on its status. . And if the alarm has been activated, the onboard heartbeat sensor will give you advanced warning if there's somebody in your car and an opportunity to evaluate the situation safely. PCC can also be used to operate the other remote controlled functions - such as the central locking, alarm, security lighting and panic alarm.

- **Satellite Radio prep (wire only, Satellite system cost extra.)**
